

PUBLICATION OF GP (MEAN) EARNINGS

From 1st April 2015, it is a contractual requirement for GP Practices to publish on their website the *mean earnings* for all GPs in their Practice. Publication of earnings for the **previous financial year** must be displayed on the Practice website by the end of the current financial year.

The average pay for GP's working in EastView Surgery in the financial year to March 2015 was £65,001 before Tax and National Insurance. In this period we were working with 3 full-time GP's, 1 salaried GP working 4 sessions per week and 1 Locum GP working 1 session per week for more than 6 months.
